

Removing the risk from SharePoint Migrations

Simplify your data migration with the right experience, tools and strategy.

While the process of data migration can be straightforward, it's not without its pitfalls. It is not as simple as cutting and pasting files straight into your new SharePoint site. Don't risk falling victim to an unsuccessful SharePoint migration.

What is a SharePoint Migration (or Upgrade)?

We use Microsoft best practices and industry leading tools for a simple, fast and efficient migration. We have experience migrating data from a range of services and platforms. Wherever your data is currently stored we can migrate it into your new SharePoint site.

Why customers use our SharePoint Migration services

- Peace of mind from using a specialist Microsoft Gold Partner
- Our understanding of the problems they face
- We use the most suitable method and tools
- Minimal disruption to users
- No need to train internal staff for a one-off project

Fixed Price Projects

- **Fully scoped project proposal for your migration**
- Managed by PRINCE 2 accredited Project Manager
- Includes any 3rd party tools required

Easier to budget for and know the job will get done!

Wealth of Experience

- **Successfully undertaken every type of SharePoint migration**
- We know the pitfalls and how to overcome them
- Over 10 years experience migrating data into SharePoint

Get it right first time by using Adepteq's experienced team

SharePoint Certified Staff

- **Gold Collaboration & Content Partner**
- Ability to fix what does not work once migrated (something will!)
- Installation, Administration, Design and Development skills

We have the skills to ensure your migration is a success.

"Adepteq assisted us in planning, migrating and issue resolution when we moved from SharePoint 2010 to 2016, ensuring the project was delivered on time"

- Peter Russell, IT Manager, Bohler-Uddeholm
