

PROTECTING MICROSOFT OFFICE 365

The first enterprise class solution influenced and guided by UK Government and Cyber Intelligence agencies that is truly effective against email phishing today

www.adepteq.com/ajax info@adepteq.com

- All incoming emails processed and checked for indicators of compromise
- Detects zero day attacks for all phishing exploits
- Comprehensive technical analysis is run to determine key attributes
- Aquilai solution uses over fifty algorithms for linguistic and technical analysis
- Creates a profile of what is the normal email flow for each user
- Automatically learns and adapts without user intervention
- Email is classified for varying levels of Phishing
- User friendly warning banners are inserted into the body of the email
- URLs rewriting prevents access to malicious web sites

Visibility

- Advanced visibility pre-empts attacks at an early stage of a Phishing campaign
- Typical attack types are highlighted based upon auto discovered company profile
- Detailed information on the Phishing warnings raise user awareness

Deployment Scenario

- Tightly integrated into Microsoft Office 365, also supports Microsoft Exchange and G Suite email
- Non disruptive deployments, no impact on email delivery
- No end-point agents or software required, works with all devices and mail clients
- Desktop, Laptop, Mobile (IOS, Android, Blackberry etc)
- No perceptible delays with email processing and delivery
- Easy to use dashboard to track email processing results and issues
